Email: **k.kumar28@outlook.com**

Profile

As a computer science professional with a passion for leveraging technology to drive positive change, I actively seek opportunities to contribute to various industries. With expertise in frontend development, specializing in React JS, Vue JS and React Native, along with a strong background in UX design and full stack development (Node JS and Java), I bring a versatile skill set and a unique perspective to the table. In my time at NetCompany, I have successfully completed deliverables, led teams, and ensured project success within an agile environment. I am adept at collaborating with clients, conducting meetings, and maintaining project progress during sprints. My experience includes international assignments in Denmark, Poland, and Norway, which have contributed to my adaptability and expanded my professional horizons.

In addition to technical proficiency in tools like Azure DevOps, GitHub, Docker, TypeScript, and more, I have a creative flair and an eye for user-centric design. I am skilled in utilizing Figma and Adobe XD for user experience design, creating intuitive and impactful digital experiences.

Beyond my technical expertise, I have actively engaged in acting, singing, volunteering, and supporting small start-up businesses during the Covid-19 pandemic. These experiences have honed my creativity, discipline, and resilience, providing me with a well-rounded perspective that extends beyond the confines of technology.

Core skills

- **Front-End Development:** Proficient in React JS, React Native, Docker, TypeScript, OpenAI, Babel, and Storybook.

- **Back-End Development:** Skilled in Java, Gradle, and Jenkins.

- **User Experience Design:** Experienced in utilizing Figma and Adobe XD to create compelling and user-centric designs.

- **Workplace Tools:** Proficient in using Azure DevOps and GitHub for efficient project management and collaboration.

Education and Qualifications

BSc (1st Class Hons)   **Computer Science**
University of Winchester (2022)

Modules undertaken: intellectual properties and information rights, cloud computing, risk management and cyber security, distributed systems, penetration testing, information management and data analytics, web application development and software development

A Levels   **Computer Science, Maths, Sociology and Physics**
2017 – 2019

Career Summary

2022 – Current   **NetCompany**   **Software Consultant**

- Working as a consultant, working with the Frontend development team, specifically in React Native, React JS and Vue JS to build a customer focused solution
- Had more senior experience working as a team lead, leading client meetings and project management skills managing a frontend team myself
- Worked on "mit.dk", a Danish digital post platform/service
- Also had experience working with documentation, management of tasks, collaborating with UX/UI team and pitching new ideas to product owners
- Had the opportunity to live in Denmark for 1 year, where I had further opportunities to travel to Poland, Norway and Aalborg

2019 – 2022   **Amazon Delivery Driver**   **Contractor Employment**

- Worked whilst at University in Winchester
- Customer facing, having to adapt to new challenges and new scenarios
- Worked through Coronavirus pandemic as an "essential worker" providing food to vulnerable people

2020 – 2021   **DogLog**   **Internship – Silicon Valley Startup**

- Worked as a remote intern for "DogLog", a mobile app created for new dog owners to track health, activities, nutrition
- Used GitHub to push commits and suggestions to the source code
- Filled out product and technical requirements for new features I suggested

2018 – 2020   **Longacres Garden Center**   **Saturday Job**
- Worked as a tills supervisor which was customer facing and improved my communication skills
- Had to face responsibility as a supervisor, whilst being able to adapt to new changes and challenges that I faced

2017 – 2018   **Primark Retail Store**   **Saturday Job**

2017 – 2018   **Brooks and Partners Solicitors**   **Summer Placement Job**
- Reception duties, photocopying, filing, preparing bundles, data inputting for accounts department
